LEAD iOS ENGINEER

iOS Architecture & Team Leadership | Swift, SwiftUI, TCA, Swift Concurrency

PROFESSIONAL SUMMARY

Lead iOS Engineer with 25+ years of software experience, including 14+ years building iOS apps for Target, DICK'S Sporting Goods, Meijer, and HarperCollins. Specializes in modernizing large retail codebases with Swift, SwiftUI, The Composable Architecture (TCA), and Swift Concurrency. Led the Meijer app's rating turnaround from 1.5 to 4.5 stars and shipped shop & scan to 600K+ monthly active users at peak. Co-inventor on U.S. Patent 7,499,164.

TECHNICAL SKILLS

Languages: Swift, Objective-C, C#, JavaScript

Apple Frameworks: SwiftUI, UIKit, Combine, Swift Concurrency (async/await), Core Data, AuthenticationServices (passkeys), Object Capture

Architecture: The Composable Architecture (TCA), MVVM, modular Swift packages (SPM), REST APIs

Testing & Tooling: XCTest, snapshot testing, SwiftFormat, Fastlane, Xcode Cloud, Git

Practices: Accessibility (VoiceOver, Dynamic Type), unit testing, code review, mentoring, team leadership

PROFESSIONAL EXPERIENCE

Lead iOS Engineer

Target Corporation | 2022–Present

- Lead iOS engineering for the Account and Deals sections of the [Target app](#), serving millions of daily active users
- Rebuilt Account screens and modernized the Deals section with SwiftUI and The Composable Architecture (TCA), replacing legacy UIKit flows and reducing crash rates across Account journeys
- Pioneered passkeys sign-in for the Target app, owning end-to-end integration with AuthenticationServices and OAuth 2.0; increased successful sign-ins and reduced password-reset calls
- Drove team-wide Swift Concurrency adoption, building shared async/await networking wrappers
- Built CI checks that enforce SwiftFormat, linting, and snapshot tests across Account and Deals modules
- Taught iOS performance-optimization sessions that established best practices for the engineering team

Senior iOS Engineer

Designer Brands Inc. (DSW) | 2021

- Led the mobile engineering team in setting coding standards, pull request processes, and architecture patterns for iOS and Android
- Architected a new search experience across Designer Brands' multi-brand apps for U.S. and Canadian markets
- Championed accessibility and modernization; built roadmaps around Swift Concurrency and Object Capture
- Designed and maintained enterprise apps for DSW store team members

Principal iOS Engineer & Engineering Manager

DICK'S Sporting Goods | 2020–2021

- Managed the iOS and Android teams: set technical direction, recruited full-time and contract engineers, and trained teams on SwiftUI and Combine
- Led the complete rewrite of the flagship DICK'S Sporting Goods and Golf Galaxy apps, replacing web-based shopping with a 100% native iOS implementation
- Established unit testing standards that reduced regression bugs by 40%

- Redesigned home-screen search, improving user engagement

Senior Developer of Mobile & IoT

DornerWorks | 2019–2020

- Led iOS and Android development for IoT products from estimation through deployment, integrating apps with connected devices and cloud platforms

iOS Lead Architect

Meijer | 2015–2019

- Rehired after a brief stint at BISSELL to build shop & scan, Meijer's scan-and-go checkout for 250+ stores; as sole iOS developer, reached 600K+ monthly active users at peak
- Led the rating turnaround of the [Meijer app](#) from 1.5 to 4.5 stars through focused quality work and user feedback
- Architected shop & scan as the Meijer app's first shopping feature and Meijer's first Swift-from-inception project, built as a component framework 95% independent of the core codebase
- Spearheaded the transition from Objective-C to Swift and presented architecture and unit testing patterns to iOS and Android teams, reducing regression bugs
- Built Team Assist, an asset protection app for store teams, at Apple's invitation-only Enterprise Development Workshop in Cupertino and presented it to ~20 Apple staff

Senior Developer for Mobile Applications & IoT

BISSELL | 2017

- Managed external development partners building iOS and Android apps for IoT-enabled home cleaning products

Senior iOS Developer

Sportsman Tracker | 2015

- Led iOS development and maintenance of the Sportsman Tracker app, keeping a 5-star App Store rating, and mentored a junior iOS developer

Senior Developer of Mobile Technologies

HarperCollins Publishers | 2012–2015

- Directed in-house mobile development for one of the nation's largest publishers, shipping The Beginner's Bible, The Purpose Driven Life, and Common Prayer, all rated 4–5 stars
- Built [The Beginner's Bible](#) as sole developer: #1 in its category, featured in App Store 'New and Noteworthy', and six-figure revenue
- Created StoryBook Builder, a WYSIWYG authoring tool used to produce 400+ interactive pages

Senior Software Engineer

X-Rite/Pantone | 2000–2011

- Built software for X-Rite color measurement products: ColorDesigner paint matching, the MatchStik LED-based measurement device, XCQC quality assurance, and Coherix surface measurement

EDUCATION

Associate of Applied Science in Computer Programming (Honors), Professional Careers Institute

PATENT

U.S. Patent 7,499,164 (2009), co-inventor

Systems and methods for profiling and synchronizing a fleet of color measurement instruments
